Education

Bachelor of computer science and artificial intelligence, *Helwan university*   09/2019 – 07/2023
Grade is very good (GPA 2.82).   Helwan, Egypt

Profile

I am a recent graduate with a degree in computer science and a focus on software engineering. During my studies, I gained experience working with a variety of programming languages and development tools, including
PHP, Python and Java. I also completed several group projects, which allowed me to develop my collaboration and communication skills.

Projects

Graduation project (Skin Classification) ⬀
An application to describe the skin diseases without doctors by you putting an image , with machine learning do processing the image and show the result, also you can do a search about the disease or talk with any doctor you want
but its just api the application
 Using : backend, Laravel(PHP)

Hospital project laravel ⬀
hospital center project it's show all news about the health ,doctors and if you want to take an appointment with the doctors to know the problem and how the admin replay about your appointment by approved it or canceled and all this show when the user login in his DM

Frontend : Templemento
Backend: PHP (Laravel)

Restaurant (Laravel) ⬀
A project about the restaurant through the admin can add a lot of things such as foods and the best chefs available through the user can request orders through the cart and there is also that you can book an appointment by specifying the name and email and the number of individuals and the date you want and the admin can receive and respond to all these messages

Frontend: Bootstrap
Backend: Laravel

Software college(Burglar alarm.)
It is a site through which it is possible, through monitoring your home, to know all the safety parties and to set the alarm device to investigate if any problem occurs through which the location of the thieves can be determined, and also if any danger can alert you by means of an alarm sound that will be issued when the problem occurs
Tools: angular ,front-end ,back-end.

Skills

1. Presentation Skills.
2. Communication skills.
3. Team Work.
4. Leadership

Courses

Laravel: Eloquent ORM, Blade templating engine, PHPUnit

HTML/CSS: Bootstrap,

Python: basics

C++ : basics

Angular :basics

Languages

Mother tongue (Arabic).	**Very Good written, listening and spoken English**	**spainish** beginner
trurkish beginner
